P.SREEDEVI PRIYA

Frontend Developer

PROFESSIONAL-SUMMARY

Personable and dedicated project assistant with self-motivated nature focused on independently handling projects and team needs.Highly organized inpreparing documentation,schedules and communications.Diligent in communicating proactively to convey project status

WORK EXPERIENCE

Project Assistant

2021-2023

Worked as project assistant in **college of applied science chelakkara**. Completed about 22+projects in different domains(Artificial intelligence,Machine learning,Deep learning,Block chain projects).Completed multiple tasks simultaneously to optimise project completion.

PROJECTS

CDQA

The **closed domain question answering system** integrated into the website allows users to ask specific questions within a designated domain. Utilizing advanced algorithms and natural language processing techniques, the system accurately analyzes queries and provides relevant answers. The website offers a user-friendly interface for a seamless and efficient question answering experience.the project is done on **Deep learning technology and BERT**

Charity

The website project I'm working on is a charity fund tracking system that utilizes **blockchain technology**. It provides a transparent and secure platform for tracking and managing charitable donations. The system leverages the immutable nature of blockchain to ensure the integrity and accountability of funds, allowing donors and stakeholders to confidently monitor and verify transactions. With a user-friendly interface, the website enhances transparency and trust in the charity sector.

self projects

- Fake News Detection
- Fake Organic Product Detection
- Charity Fund Tracking
- Sarcasm detection
- Expenditure Tracking
- Restaurant recipie detection

CERTIFICATION

- Python Django Full Stack Web Developer Training at Luminar Technolab
